

Iron Horse No. 2000 Roper:
AB1014E2

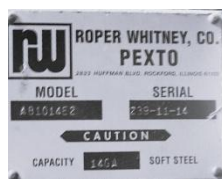

10 Foot Roper Straight Machine
AB1014E2 Year 2001

Has been inspected, cleaned with our stage 1 paint job. All parts needed to bring the bending machine back the full operational condition have been identified and replaced.

Description

The Autobrake 1014 provides accuracy and repeatability when forming 14 gauge or lighter materials. This sheet metal brake is a high-speed solution to make multiple bends while maintaining a high-quality level in the end product. Both backgauge options provide accurate part location through the use of servo drives .

The price for the Autobrake listed above is: \$63,000.00 US Dollars

AB1014 comes with an ECS touch screen.

The Autobrake can be upgraded to Titan control For an additional cost.
